Axos

He who understands more about sitting creates the best seats.

Second and third generation managing directors: Helmut, Werner and Joachim Link (left to right)

Interstuhl

The idea of a Swabian businessman and developer is embarking on an international journey. It's all about attractive and healthy seating, whether we use it to work, think, discuss, argue or relax.

It's all about a chair that actively supports us at what we are doing.

Interstuhl innovations are conceived, tested and developed in an interesting mix of think-tank and expert laboratory. That is what makes us so unique. Simply stated by Werner Link, the company's owner and Managing Director: "We understand more about sitting". An honest statement that has its origins back in 1961 when the assignment was to create relaxing seating for the workers of a textile factory. The focus ever since has been on expertise and a genuine interest in our products

and the people who use them. We remain true to the spirit of our brand by collaborating with leading institutes on the scientific development of our products. This has resulted in a collection that is unparalleled in its breadth and depth. He who understands more about sitting, has studied it in detail. Interstuhl is such a company and will remain so: a world away from corporate affiliations and concerns about globalization. Over 600 employees craft exclusive German goods and they do so in Germany.

Anyone who understands more about sitting should rise up. Rise above the tired old clichés about quality and materials. Interstuhl is what it is, and what it is is very good.

Managers are envied. For their disposition. For their perfect appearance. For their confidence. For their largesse – they have everything and can do everything. They know each other and promote each other. They are envied for their cars, their privileges, their secretaries, their tailored suits, their expense accounts, and their salaries.

A polished appearance is a product of managing, of constantly bearing responsibility. Confidence is a prerequisite for leading a team. Company cars are used to work in. Privileges come expensively. Earnings are not salary but critically measured success. Managers carry a heavy burden.

Shouldn't even more good ideas take a seat? Axos.

Shouldn't even more good ideas take a seat? Axos for managers has arrived - with a clarity of design and purpose. With the latest knowledge at hand. There are many seats for decision-makers but only a few with such a clear profile. Innovative, upstanding, and to the point. A seat to identify with – and a lot of privileges. An office chair constitutes the framework for the headwork.

A head which it must effectively support, a head that must make lasting decisions, and a head that must think in terms of economy: create teams, lead partners. An emotional and objective seat of intelligence. For people who identify with reducing things to the beauty of the essential form, but still generous in the details. People who want to have all the

comforts beneath them. There are many occasions for lying back to think about things during the day - to sort your ideas or to find the peace and quiet to concentrate on the issue, escape the hectic pace for a moment. It is in fact critical that you do.

Dynamic seating frees your head too.

Axos enriches any room, any working situation. Axos emanates competence and a love of quality, both of which are important preconditions for communication in efficient economic systems. Every detail has been excellently crafted. For example the flush leather inlay that fits exactly in the walnut tabletop, the high-quality workmanship of the leather and many more details that display an appreciation of value.

Perfect lines, self-explanatory quality controls

Interesting juxtaposition of materials : perfectly crafted leather and chrome

Invisible technology: the data connection panel is flush mounted in the table. It concentrates on organising all of your connections.

Transmotion mechanism to recline in luxury

Perfection in every detail

The next position is the best

From the seating specialists

Fact: from an anatomical point of view ergonomics means movement because movement is a critical part of office health. It is a law of nature that effective work processes are one of the most important sources of value-added in the company. Back problems are the greatest causes of absenteeism. A good chair will not heal your back but it is good preventive medicine and eases the pain

for those who already suffer. What does an Interstuhl chair do? The patient therapist offers support in each posture. It generates a feeling of well-being in all positions and brings measurable relief. Naturally, the courage to follow our philosophy of dynamic sitting has meant a break with all the old rules: majestic, immaculate and bolt upright vs. the new philosophy of doing it with gusto, reclining, lounging, looking out the window, concentrating.

“You can sit however you want. Just sit on the right chair.” Each new product development with leading research institutes reconfirms this and it is substantiated by scientific input. The result: Interstuhl chairs accommodate every posture so ergonomically that maximum support is ensured.

1 Transmotion mechanism

The Transmotion mechanism ensures maximum relaxation when reclining for the seat follows a rail arching down towards the back.

2 Telescopic spring

Prevents jarring even when the chair is in its lowest position, protecting your lower vertebrae.

3 Weight adjustment

The individually adjustable counter-pressure of the backrest permits correct sitting for both light and heavy users.

4 Head and neckrest

Provides valuable relief to the neck and shoulder muscles when reclining.

Conference chair

Executive swivel chair

Conference cantilever chair

Tables

Lounge table

Mobile file unit

¹ optionally with leather inlays and supports ² optionally with conference and media technology

Take a seat and take your time. Axos lends a top-class atmosphere to rest areas and discussion sessions with a clear, exclusive space concept for any sojourn and relaxed waiting.

Premium products

Often the word innovation is more of an obstacle than a useful coordinate – all too often inflated claims and abuse of the term for purely promotional reasons obscure the distinction between real innovation and the purely derivative. This is why we are particularly pleased that customers can now not only experience the quality of our products, they can see it too: we are the first manufacturer to be granted the right to label our products with the official “Premium Product” seal, awarded by the LGA testing company and TÜV Rheinland Group certification body. In addition, we have won yet another accolade: the best “Quality Office”. Put simply, every Interstuhl product provides a premium sitting environment and all owners of Interstuhl chairs can rest assured that they have chosen the best possible product. This has a positive impact on the person as a whole and their entire working day. Knowing this, we are more than happy to issue a 5-year guarantee. We share the praise for our innovative seating solutions with the research institutes that are always ready to support our developments and think we’ll keep doing things this way.

Quality Office

Awarded by the Verband Büro-, Sitz- und Objektmöbel e.V., the German Standards Institute (DIN), the Verwaltungs- und Berufsgenossenschaft, INQA Büro, Initiative neue Qualität der Büroarbeit, and the Federal Institute for Occupational Safety and Health.

Axos was created by the Moll industrial design studio. It was important for us that the guiding principles of Moll design were followed in the creative process: “The sum total of the qualities of a product or product type are filtered and compressed into one identity and given a large measure of invulnerability.” As a result, Axos is equipped with many ergonomic features and is a genuinely novel approach to a beautiful, formally reduced office chair. A novelty that stimulates during both hand-work and head-work. Product-design: .molldesign © interstuhl.
