Campos

Whoever understands more about seating creates the perfect place for anyone.

Second and third generation managing directors: Helmut, Werner and Joachim Link (left to right)

Interstuhl

The idea of a Swabian businessman and developer is embarking on an international journey. It's all about attractive and healthy seating, whether we use it to work, think, discuss, argue or relax.

It's all about a chair that actively supports us at what we are doing.

Interstuhl innovations are conceived, tested and developed in an interesting mix of think-tank and expert laboratory. That is what makes us so unique. Simply stated by Werner Link, the company's owner and Managing Director: "We understand more about sitting". An honest statement that has its origins back in 1961 when the assignment was to create relaxing seating for the workers of a textile factory. The focus ever since has been on expertise and

a genuine interest in our products and the people who use them. We remain true to the spirit of our brand by collaborating with leading institutes on the scientific development of our products. This has resulted in a collection that is unparalleled in its breadth and depth. He who understands more about sitting, has studied it in detail. Interstuhl is such a company and will remain so: a world away from corporate affiliations and concerns about globalization. Over 600 employees craft exclusive German goods and they do so in Germany.

Anyone who understands more about sitting should rise up. Rise above the tired old clichés about quality and materials. Interstuhl is what it is, and what it is is very good.

Good design is the sum of good details

17C2

Refined geometry and excellent design.

A clear image and the sum of all things which make a good office swivel chair: Quality materials processed into precise, subtly integrated details which invite you to look and touch. Thanks to first class details, the designer, Reiner Moll, has managed to combine the solid character of Campos with light aesthetics and turn it into something special. A highly convincing budget-friendly office chair with aesthetic appearance: a classic look with all the ergonomical advantages and design experience of the manufacturer, interstuhl. All-round attractive and affordable design.

Understated. Campos simply shows good taste and an ambition of quiet gestures. Straight forward and honest. A superbly beautiful chair for every office

area. On its own or used in a large office: good design for people with new business ideas and convincing actions.

Campos with mesh back or upholstered back creates a variety of design options and offers different seating dynamics. The mesh back offers a solution which adapts to any posture. In the upholstery version Campos invites you to lean back in superior comfort.

17C2

Swivel chair, mesh back, synchronous mechanism, T-armrests, weight regulation, backrest height adjustable, black plastic base

15C2

Swivel chair, upholstered back, synchronous mechanism, T-armrests, weight regulation, backrest height adjustable, brilliant silver base

The designer's balanced colour concept with six coordinated subtle shades forms the basis for the range. In addition the interstuhl upholstery range is available in a variety of colours and fabrics and leathers.

15C2, upholstered back

17C2, mesh back

Different and yet still coordinated as a unit: Two types of visitor chairs are available in the Campos range. With mesh or upholstered back.

optional armrests

46C0

The backrest's mesh is particularly tightly woven and thanks to its doubling is almost opaque – at the same time it offers maximum breathability and optimal adaptation to every sitting position

The upholstered back offers superb seating comfort, a pleasantly comfortable seating sensation and provides the back with excellent ergonomic support

The backrest height adjustment wheel: Precisely finished, highlighted as an attractive detail

Seat depth and inclination can be individually adjusted in one single operation

Large lever for weight regulation and seat height adjustment which is intuitive to use

4D T armrests, adjustable in four directions with soft arm pads

The next position is the best

From the seating specialists

Fact: from an anatomical point of view ergonomics means movement because movement is a critical part of office health. It is a law of nature that effective work processes are one of the most important sources of value-added in the company. Back problems are the greatest causes of absenteeism. A good chair will not heal your back but it is good preven-

tive medicine and eases the pain for those who already suffer. What does an Interstuhl chair do? The patient therapist offers support in each posture. It generates a feeling of well-being in all positions and brings measurable relief.

Naturally, the courage to follow our philosophy of dynamic sitting has meant a break with all the old rules: majestic, immaculate and bolt upright vs. the new

philosophy of doing it with gusto, reclining, lounging, looking out the window, concentrating.

"You can sit however you want. Just sit on the right chair." Each new product development with leading research institutes reconfirms this and it is substantiated by scientific input. The result: Interstuhl chairs accommodate every posture so ergonomically that maximum support is ensured.

1 Synchronous mechanism

The synchronous movement of the seat and backrest provides optimum support for the back in every position; the push effect is eliminated.

2 Base seat height adjustment

The seat height is a precondition for good sitting. The base seat height adjustment extends the DIN-defined adjustment range and allows ideal sitting for short or tall users.

3 Weight adjustment

The individually adjustable counter-pressure of the backrest permits correct sitting for both light and heavy users.

4 Backrest height adjustment

The support range for the lumbar spine can be ideally adjusted to the height of the user.

5 Seat depth adjustment

Regulates the distance between the backrest and front edge of the seat, thus providing optimum support for the upper thighs; even for taller users.

6 Seat inclination adjustment

Multiple adjustment of the seat in a forwards direction stops the pelvis from tilting back. This relieves the spine and avoids a poor posture

7 Continuously adjustable lumbar support

The horizontally adjustable lumbar support adapts to the individual curve of the lumbar spine; this reduces muscle strain.

8 Adjustable armrests

Height adjustment to take the strain off the neck muscles. Width adjustment and pivoting for optimum support angle, depth adjustment for optimum distance to the desk.

Campos' appearance can be improved even more with various tasteful colours in leather. Giving it a look of solidity and coolness.

Premium products

Often the word innovation is more of an obstacle than a useful coordinate – all too often inflated claims and abuse of the term for purely promotional reasons obscure the distinction between real innovation and the purely derivative. This is why we are particularly pleased that customers can now not only experience the quality of our products, they can see it too: we are the first manufacturer to be granted the right to label our products with the official "Premium Product" seal, awarded by the LGA testing company and TÜV Rheinland Group certification body. In addition, we have won yet another accolade: the best "Quality Office". Put simply, every Interstuhl product provides a premium sitting environment and all owners of Interstuhl chairs can rest assured that they have chosen the best possible product. This has a positive impact on the person as a whole and their entire working day. Knowing this, we are more than happy to issue a 5-year guarantee. We share the praise for our innovative seating solutions with the research institutes that are always ready to support our developments and think we'll keep doing things this way.

Quality Office

Awarded by the Verband Büro-, Sitz- und Objektmöbel e.V., the German Standards Institute (DIN), the Verwaltungs- und Berufsgenossenschaft, INQA Büro, Initiative neue Qualität der Büroarbeit, and the Federal Institute for Occupational Safety and Health.

Campos comes from the design office .molldesign. Apart from the job of giving every new product its own identity and a touch of invulnerability, .molldesign concentrates on the practical value as well as ergonomic and energy technology for every new design. This ensures its existence and raison d'être in the long term. High quality and efficiency were the driving forces behind the development of Campos.
