

Technical data sheet N1140

Specification Folding table, boat-shaped medium, 2-parts

Dimensions in mm

Total:	H:	740
	D:	1100/815
	L:	4000

Packaging data	Weight:	kg	48
	Volume:	m³	3,3

Basic equipment

Benefit

Frame	Tubular steel, bent in the shape of a "drop". Double T-design, connected twice with crosswise laying round pipe adapter. Welding seam is covered by a plastic covering.	Stable, elegant and interesting design.
Longitudinal beam	4 edges black steel pipe with connected release tilt/ fold mechanism via round tubular steel hoop.	
Frame surface	Powder coated black.	Matches all offered table surfaces.
Castors	Castors with height adjustment and lock.	Adapts to uneven floors. Therefore, the table remains level.
Table top	MDF, 25mm, foldable	
Table top shape	Boat-shaped, 2 parts (with table connectors). 4000 mm long, 1100/815mm deep.	Enables to use one table only or table rows.
Table top surface	HPL, plastic laminate premium white. Stabilizing/bottom layer same colour.	Durable plastic laminate.
Table edge	ABS, 2mm strong, 13mm straight then chamfer. Matches the colour of the table top.	ABS edges are also suitable for tough environments.
Connector/ Substructure/ Top	Plastic fitting.	
Table connectors	Two plastic table connectors per scouring sides of tops.
