

## Technical data sheet N1148

Specification Folding table, boat-shaped big, 2-parts

Dimensions in mm

|        |    |          |
|--------|----|----------|
| Total: | H: | 740      |
|        | D: | 1100/815 |
|        | L: | 4800     |

|                |         |    |      |
|----------------|---------|----|------|
| Packaging data | Weight: | kg | 52   |
|                | Volume: | m³ | 3,92 |

### Basic equipment

### Benefit

|                              |  |  |
|------------------------------|--|--|
| Frame                        | Tubular steel, bent in the shape of a "drop".<br>Double T-design, connected twice with crosswise laying round pipe adapter. Welding seam is covered by a plastic covering. | Stable, elegant and interesting design.                      |
| Longitudinal beam            | 4 edges black steel pipe with connected release tilt/ fold mechanism via round tubular steel hoop.   |  |
| Frame surface                | Powder coated black.   | Matches all offered table surfaces.                          |
| Castors                      | Castors with height adjustment and lock.   | Adapts to uneven floors. Therefore, the table remains level. |
| Table top                    | MDF, 25mm, foldable  |  |
| Table top shape              | Boat-shaped, 2 parts (with table connectors).<br>4800 mm long, 1100/815mm deep.  | Enables to use one table only or table rows.                 |
| Table top surface            | HPL, plastic laminate premium white.<br>Stabilizing/bottom layer same colour.  | Durable plastic laminate.                                    |
| Table edge                   | ABS, 2mm strong, 13mm straight then chamfer.<br>Matches the colour of the table top.   | ABS edges are also suitable for tough environments.          |
| Connector/ Substructure/ Top | Plastic fitting.   |  |
| Table connectors             | Two plastic table connectors per scouring sides of tops.   |  |
