

X&Y creates space. Today a workshop, tomorrow a seminar room, and the day after, an auditorium. Modern spaces are made to be used in whatever way you choose. X&Y gives you this freedom of choice. The flexibility and dynamism of X&Y allow you to re-think your space again and again. Mobility, comfort and quality are fused together in the characteristic shape of X&Y and give freedom a distinctive look.

X&Y is the synthesis of design and comfort.

It is almost a pity that the X&Y is so comfortable to sit on. Because it's all too easy to overlook how good it looks. With his keen eye for detail, Emilio Ambasz has created a chair that is both full of character and in harmony. The shape of the seat and backrest ensure maximum possible comfort. And for people who like something softer, there is optional seat and back upholstery available.

X&Y invites you for a meal. X&Y is also perfectly suited for canteens and bistros. It is easy to clean, easy to stack, and has a comfortable shape. And since it is well known that we also eat with our eyes, X&Y is available in two colours of plastic and several variations of upholstery.

X&Y makes your sitting arrangements more spontaneous. All you have to do is decide where your next round of discussion is going to take place. The optional writing tablet gives you the freedom to vary the location and the seating arrangements as you wish.

X&Y gets in line. In multi-functional rooms X&Y reveals its true potential as a real multi-purpose chair. It has all the best attributes needed to make it easy to move around: clear shape, minimal weight, easy stackability, and outstanding sitting comfort. X&Y is also perfectly equipped to be set out in rows. And of course it has comfortable row connectors, seat numbering, and panic exit devices.

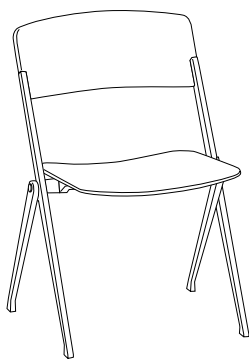

X&Y makes sitting lighter. At only 5 kg, X&Y is a true featherweight. So putting the chairs out is easy. And in stacks of up to 10 chairs, X&Y takes up minimum space until it is next needed.

X&Y is with you all the way. The flexibly positioned backrest accompanies the upper body as it moves. So the X&Y supports dynamic sitting. That is ergonomics you can't see – but can quite definitely feel.
